

₿TCJET

Innovating Private Jet Travel Experience

BTCJet is an innovative project that seamlessly integrates web5 technology with private jet services. Through the issuance of BTCJet NFTs, we offer a new way for web5 high-net-worth individuals to travel, not only enjoying VIP private jet services but also benefiting from continuous value growth, airdrops, and various luxury perks.

As of now, we have access to approximately 17,000 private jets via an information-sharing system. Our goal is to create a unique ecosystem by combining Bitcoin and web5, meeting the ever-growing demand in the private jet market, while providing users with unprecedented experiences, rewards, and services.

BTCJet stands at the intersection of two rapidly growing markets: private jet services and the web5 ecosystem. We believe that by combining the strengths of these two fields, we can create immense value and returns for participants, builders, and users, and secure a leading position in this opportunity-rich market.

Private Jet Market Analysis

A private jet is shown on a runway at sunset. The aircraft is dark blue with white accents. The word "bitcoin" is written in white on the side of the fuselage, with a yellow Bitcoin symbol to its left. The tail fin also features a yellow Bitcoin symbol. The engine nacelle has a white "B" inside a circle. The background shows a sunset sky with orange and yellow hues over a dark landscape.

Market Size

The global private jet market surpassed \$20 billion in 2023, and it is expected to continue expanding at an annual growth rate of 7-8% over the next five years. This growth is mainly driven by the global economic boom and the increasing number of high-net-worth individuals.

Demand Growth

Private jet travel is not only a symbol of wealth but also the preferred choice for elites due to its flexibility and efficiency. Especially in the post-pandemic era, the demand for customized, high-privacy air services has significantly increased.

BTCJet's Opportunity

By integrating web5, BTCJet brings innovative solutions to this rapidly growing market. Our services meet the travel needs of high-end clients while giving NFTs practical use, providing new opportunities, potential returns, and a status symbol for web5 digital nomads.

Development Phases

1

Launch of BTCJetClub NFTs

The price of NFTs varies at different stages, starting from 0.0035 BTC. Only those on the whitelist can access the lower price stages. NFTs serve both as digital assets and as a pass to join the future Club, offering various rewards, profits, and perks depending on the number of NFTs held.

2

Fulfillment of Promised Rewards

The reward distribution phase will be activated once NFT sales hit the soft cap of \$2 million (33 BTC). Specific rules for reward distribution will be updated periodically. Each person is entitled to one free private jet ride.

3

Establishing BTCJet Club

By combining the physical private jet economy with the digital NFT economy, we will establish a new top-tier club offering luxurious services, a social platform, and exclusive resources for top investors and web5 professionals. Lifetime membership in this prestigious club will cost 1 BTC, but those holding 100 NFTs can join for free. Specific member benefits and top-level services will be outlined in the Club's membership rights details.

4

BTCJet Bitcoin Found

In the fourth phase, BTCJet will establish a Bitcoin fund with a target size of \$500 million, attracting top-tier LPs (Limited Partners) and investing in the web5 ecosystem and high-end aviation industries. BTCJet will purchase private jets, expand its fleet, and aim for leadership in the high-end private travel sector. LPs will receive profit-sharing dividends, and NFT holders will be eligible for additional rewards based on their NFT tier.

BTCJet NFT Holder Benefits

Imperial VIP (Hold 100 NFTs)

Enjoy one free private jet ride; 50% discount on all charter services within the platform. Participate in a lottery to win a free cruise or island party, along with other tier-specific rewards.

As the highest-level VIP, this tier offers the best benefits, suitable for elites and affluent individuals who frequently use private jets. It includes free entry into the Club (waiving the 1 BTC membership fee) and LP profit-sharing rewards

Diamond VIP(Hold 50 NFTs)

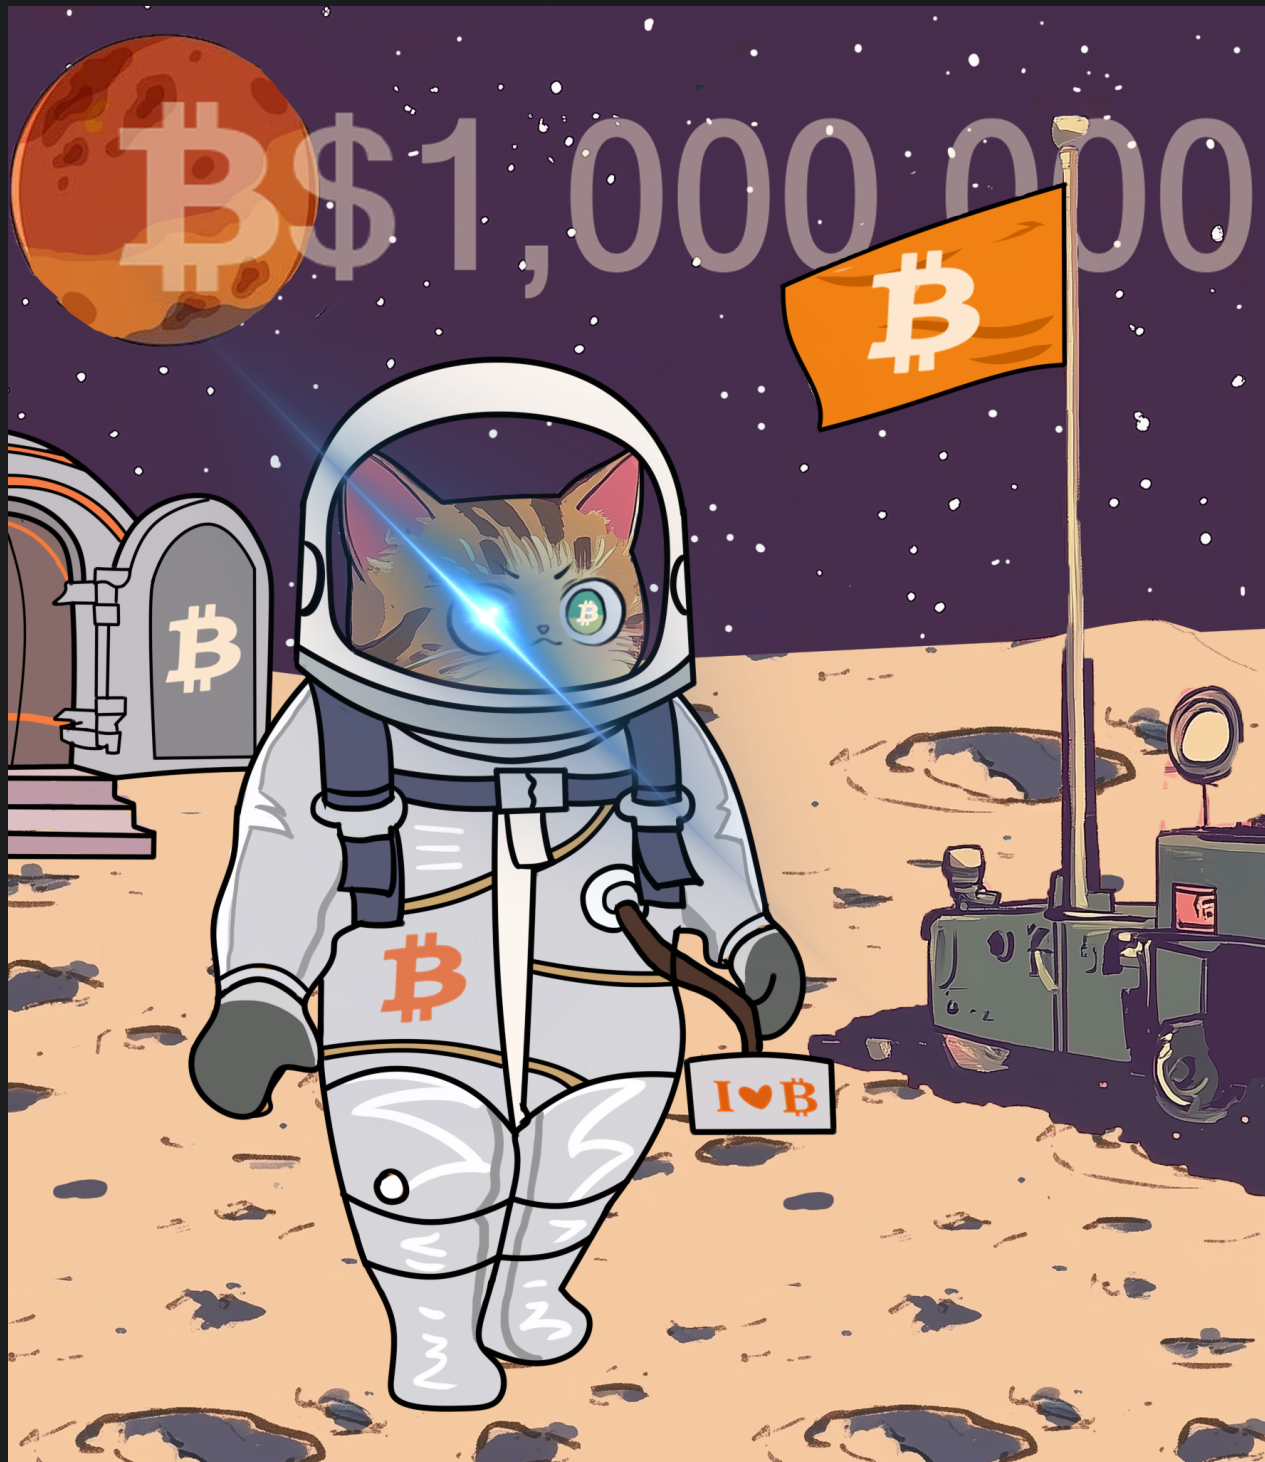

EnjoyReceive a 30% discount on charter services; participate in the lottery for a free cruise or island party and same-tier rewards. This mid-to-high level VIP offers competitive discounts, ideal for successful individuals who often need private jet services. Some of the Club membership fees can be offset, and this tier is also eligible for partial LP profit-sharing.

BlackGold VIP (Hold 20 NFTs)

Receive a 12% discount on charter services; participate in lotteries to win luxury items like iPhones or Hermes products. This entry-level VIP tier offers a cost-effective choice for occasional private jet users, allowing more people to experience high-end travel. Some of the Club membership fees can be offset, and holders will enjoy a portion of the Bitcoin fund's profit-sharing rewards.

Airdrop Rewards

All VIPs will receive BTCJet's Inscription airdrop rewards. There may also be additional targeted airdrops from other communities, as well as luxury product draws or premium services. This mechanism further enhances the value of holding BTCJet NFTs.

BTCJet's Innovative Revenue Model

1 NFT Sales Revenue

Funds raised through the issuance of BTCJet NFTs will be used to purchase jets, establish a service platform, and cover operational costs, providing strong support for subsequent business development.

2 Charter Discount Revenue

We offer VIP users customized charter discounts. Users pay the discounted fees for their flights, generating stable cash flow for BTCJet. This model meets user needs while ensuring continuous project profitability.

3 Value-Added Services and Partnerships

We will gradually establish partnerships with luxury hotels, resorts, high-end restaurants, and other institutions to provide comprehensive VIP service packages. These value-added services not only increase revenue but also enhance the user experience and customer

4 Club Membership Fees and Fund Revenue

Club membership fees are 1 BTC per member; we expect 1,000 elite members to join within three years. Additionally, BTCJet's Bitcoin Fund will generate returns from investments, and LPs will receive management fees for overseeing funds.

BTCJet's Roadmap

Short-term Goals (Within 1 Year)

Complete the initial NFT issuance and establish a preliminary user community. Ensure early VIP users enjoy the rights they purchased. Continue maintaining and expanding the community, encouraging decentralized leadership for greater fairness.

Mid-term Goals (Within 2-3 Years)

Build and launch the BTCJet private jet service platform, allowing users to directly search for and book private jet routes. Actively expand into international markets to attract more global users.

Long-term Goals (Within 5 Years)

Expand the jet fleet, add more route options, and improve service capacity. Build a global ecosystem for private jet services, becoming the leading brand at the intersection of private aviation and blockchain. Continue driving up the value of BTCJet NFTs, making them not just a pass for high-end services but also a highly valuable investment asset.

Financial Forecasts & Risk Analysis

Funding Needs	Revenue Expectations	Risks
Aircraft acquisition and operations: \$50 million - \$100 million	NFT sales: \$2 million - \$5 million	Market risk: Economic fluctuations affecting demand
Platform development and maintenance: \$2 million - \$5 million	Charter services: Annual revenue of \$50 million - \$200 million	Technology risk: Changes in blockchain regulations
Marketing: \$1 million - \$3 million	Club membership fees: \$10 million - \$50 million	Competition risk: Intensifying market competition

BTCJet's innovative business model is expected to generate profits in the short term, with promising long-term growth prospects. We have developed comprehensive risk management strategies, including market diversification, continuous technological optimization, and differentiated services, to ensure the project's steady development. We believe BTCJet will become a leader in the private jet market and NFT space, delivering substantial returns for investors.
